

Cambridge Pathway ▶ A clear path for educational success from age 3 to 19

Learn • Discover • Achieve

Ready for the next step

Cambridge Early Years will prepare your child for the transition to primary school, helping them move from play-based learning to more formal teaching.

Once they have finished Cambridge Early Years, your child will be **ready for the next stage of their education journey** – whether they move on to Cambridge Primary or another programme.

What is Cambridge Early Years?

Cambridge Early Years is our exciting new programme for 3 to 6 year olds.

It gives children the best start in life, helping them to meet key early milestones and thrive in and outside of school.

Our play-based approach puts your child at the heart of their education, allowing them to learn at their own pace.

Our holistic curriculum focuses on the whole child, and connects their development with the world and people around them.

It encourages children to begin acting independently, make their own choices and discover feelings of confidence and self-worth.

Like your child, Cambridge Early Years is unique

- ✓ It's based on the very latest educational thinking and research.
- ✓ It's flexible so it can be adapted to meet your child's individual needs.
- ✓ It's designed to meet the needs of learners who have a home language other than English.
- ✓ It offers a school or nursery setting everything they need to provide a high-quality early education. Every part of the programme fits perfectly together.

A holistic, child-focused approach

Our curriculum supports all aspects of your child's development. We split our content into six learning areas – but these are all connected and taught together as children play and discover the world around them.

Communication, language & literacy

Speaking, listening, reading and writing are crucial to children's early development. Showing children the importance of language through fun activities and books helps to ignite a lifelong curiosity for learning.

Creative expression

Creative expression allows children to communicate their ideas and develop their imagination through art and design, music, dance and drama.

Mathematics

At an early age, it's important to help children recognise how mathematics impacts everyday life. Your child will begin to learn about maths in fun and engaging ways.

Personal, social & emotional development

This area underpins your child's wellbeing and attainment in all other areas of their learning. It helps them to develop social learning and friendships, regulate their emotional responses, respond to the needs of others, and develop self-esteem and confidence.

Physical development

Your child will develop movement skills through play, helping them to develop positive attitudes towards exercise and laying the foundations for healthy, active lives.

Understanding the world

Your child's natural curiosity will be encouraged as they learn to reflect, question, explore and interact with the world around them.

Our programme provides everything

a school or nursery setting needs for an early years education.
